

# Virus / COVID-19 -fight with SCO Tech

The PCR (polymerase chain reaction) method has proven itself as the Standard method in the global fight against COVID-19. With us you will find a large selection of required Products whereby virus infections such as COVID-19 and corresponding antibodies can be detected.

This process is divided in three sections. Samples are taken first, then the samples will be prepared, the test is carried out and finally the evaluation is carried out.

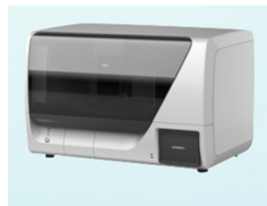

## 1. Taking and preparing the sample

Step 1	Required products
Take a sample Clean sample Disclose nucleic acid	Swabs or test kits, biosafety cabinet, pipettes, pipette accessories, shaker, centrifuge, incubator

## 2. Execution

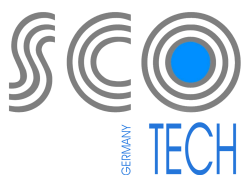

Step 2	Required products
Nucleic acid Extraction PCR reaction test	Shaker, centrifuge, nucleic acid extraction system, pipette, realTime PCR

## 3. Evaluation with our software solution

SCO Tech is a brand of System Consultancy & Operation GmbH, which acts as a supplier and platform for laboratory and scientific devices and offers complete project solutions according to customer requirements.
