

Latex Glass Slides NEW

The glass slide is specially designed for Latex Agglutination and Coagulation tests. The hydrophilic, glossy surface ensures specimens and reagents to be mixed thoroughly and efficiently, meanwhile the hydrophobic rings provide a clear demarcation of the active working area, to avoid the flow of reagents and specimens out of testing area during experimental operation. And the complete printed rear side in a sharp contrast with the active working area, provides an efficient agglutination platform to assist in both work and judgment.

- 2mm thick glass plate with ground edges, for optimal safety
- Color rings printed on the front side of the plates, to prevent liquid from over flow
- The plates with a black rear side, for use with white Latex
- The plates with a white rear side, for use with colored Latex

Black, Blue oval rings

Oval ring: 30x19mm

White, Blue oval rings

Glass slide: 52x108x2mm(thickness)

Applications

- Pregnancy testing
- Syphilis testing
- Rubella testing
- Rheumatoid Factors detection
- C Reactive Protein detection
- Anti Streptolysin O detection
- Anti DNP detection
- Heterophile antibody detection
- and more

P/N	REAR SIDE	FRONT SIDE	PACKING
0382-0001-13	black	Red oval rings	50pcs/box, 400pcs/carton
0382-0001-02	black	Blue oval rings	50pcs/box, 400pcs/carton
0382-0001-08	black	Green oval rings	50pcs/box, 400pcs/carton
0382-0001-16	black	White oval rings	50pcs/box, 400pcs/carton
