

Tissue Processing/Embedding Cassettes (EM 102&113)

One-piece & snap-latch design allows convenient one-hand operations, and helps relock the lid firmly during the processing

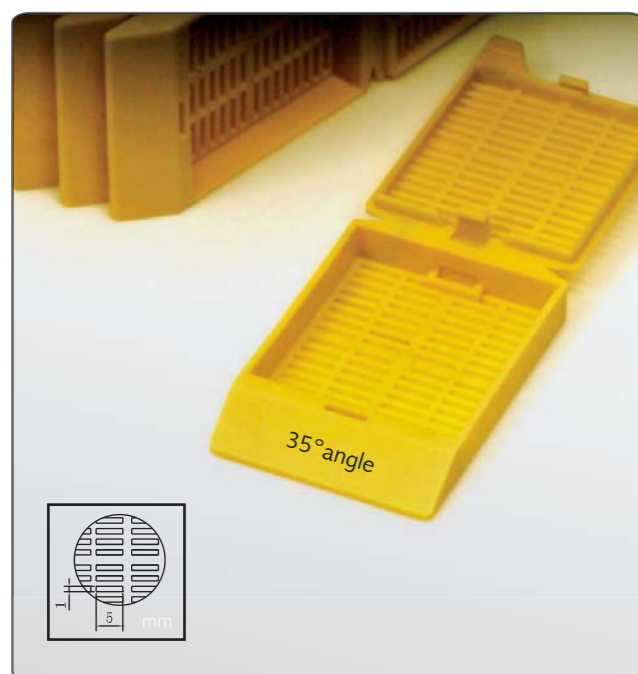

- Made of P.O.M material, 100% resistant to chemical action of histological solvents
- With rectangle holes in dimensions of 5.0mm x 1.0 mm
- With two large labeling areas on the cassette sides and one slanted front writing surface

EM 102 Tissue Processing/Embedding Cassettes

45° anterior writing surface, adaptable to most of the cassette labelers

Tissue Processing/Embedding Cassettes (EM 117&118) NEW

Improved slanted front writing surface of 45° angle, specially for the thermaltransfer printing system

- Made of P.O.M material, 100% resistant to chemical action of histological solvents
- With rectangle holes in dimensions of 5.0mm x 1.0 mm
- With two large labeling areas on the cassette sides and one slanted front writing surface
- Allowing for a greatly improved fluid exchange with extra anterior & posterior slots

EM 117 Tissue Processing/Embedding Cassettes

One-piece & snap-latch design allows convenient one-hand operations, and helps relock the lid firmly during the processing
