

Base Molds

Reusable Base Molds

Designed for facilitating same styles and same types of cassettes as well as embedding O rings in specimen embedding, compatible with most of the commonly-used embedding equipments

Packaging: 10psc/pack,200pcs/inner box, 2,000pcs/carton

With fine polished surface and well-grounded corners

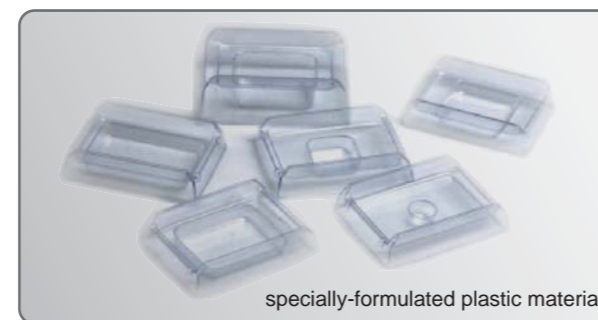

SPECIFICATION (mm)		WITH NET WELL DEPTH OF 7MM		WITH NET WELL DEPTH OF 9MM for processing bigger tissue specimens

Biopsy Bags

Used to hold small biopsy and histological specimens during processing

- Manufactured from solvent resistant Polyester, effectively prevent the deformation
- Thin mesh (0.2x0.2 mm) provides excellent fluid exchange and avoids small sample loss
- Convenient peel-open bag allows for placing and removing specimen rapidly

P/N	DESCRIPTION	PACKING
0110-0012	Small Polyester biopsy bag, 30x45 mm	100 pcs/unit, 10x100 pcs/box
0110-0013	Medium Polyester biopsy, 45x75 mm	100 pcs/unit, 10x100 pcs/box
0110-0014	Large Polyester biopsy, 75x95 mm	100 pcs/unit, 10x100 pcs/box

1 Put the biopsy in the bag and fold its end
2 Place the cassette and enclose to process as a usual processing
3 Extract the bag from the cassette
4 Open it with care extending the edges
5 extract the sample for embedding in paraffin

Biopsy Foam Pads

Designed for assisting the regular cassettes in holding the small biopsy specimens in place during processing, fits all the AA® regular cassettes

Made of PU foam

Packaging: 5000pcs/pack, 20000pcs/carton
